VIDYANIDHI: INDIAN DIGITAL LIBRARY OF ELECTRONIC THESES

The Vidyanidhi project based at the University of Mysore and sponsored by India's National Information System for Science and Technology (NISSAT) is emerging as a national effort to create, maintain, and provide network access to a digital library of Indian theses. Vidyanidhi—a Sanskrit term meaning treasure of knowledge—has a two-fold objective: to provide network access to Indian theses; and to reach a global audience for research from Indian universities.

Vidyanidhi is a direct consequence of the policy initiatives identified in the Information Technology Action Plan [1]. The impetus has come primarily from a policy initiative [2] that makes it mandatory for all universities or deemed universities in the country to host "every dissertation/thesis on a designated Web site."

Vidyanidhi is intended to demonstrate the utility of digital library technologies in maintaining, enhancing access to, and visibility of Indian academic research. We are currently examining relevant standards for electronic publishing and metadata; interoperability issues; and multilingual and multi-script issues at all levels—metadata, full-content database of Electronic Theses and Dissertations (ETDs) in Indian scripts, and languages and development of the search interface.

The building blocks of the Vidyanidhi are two full-content databases and the metadata database; the search engine; the user interface with multilingual interfaces layered and embedded within. The multilingual interface under development will accept queries in English or any Indian language. Vidyanidhi will eventually emerge as a distributed

input and database environment for the ETDs digital library. In the immediate future, however, it will be a centralized repository facilitating network access. This is necessary and important for the purpose of evolving a national consensus and agreement on all relevant issues and standards. However, the goal—to assist the end-user community in obtaining access to one of the most neglected and under-utilized of all resources—remains irrespective of the structure and technology that ultimately emerges. ■

2nd Asian International Mobile Computing Conference

Langkawi, Malaysia

14 – 17 May, 2002

<http://www.fsktm.um.edu.my/amoc>

amoc-enquiry@fsktm.um.edu.my

Authors are invited to contribute research papers related to mobile computing. Topics of interest include, but are not limited to:

- | | | |
|---|---|--|
| o Agent technology | o Quality of Service (QoS) | o Terminal design & ergonomics |
| o Data services / management | o Power management | o Sensor Networks |
| o Economic pricing of wireless networks | o Personal Communication Systems | o Wired/Wireless system integration and technology |
| o Handover & location management | o WAP/Bluetooth technology and implementation | o Wireless Communication Technology |
| o M-commerce | o Security | o Wireless LANs/WANs |
| o Mobile internet access | o Personal Area Network | o Wireless multimedia |

Paper Submission Guidelines

Papers should be original, unpublished and not more than ten single-spaced pages with a minimum font size of 10 pt. Papers should be submitted in postscript format, and should only contain the paper title and the body of the paper, WITHOUT author names and affiliations. A separate document containing only the title, author names their respective affiliations, in plain text format, is required. Please send your paper (in postscript format) and your separate author page (in plain text format) in separate emails to amoc-submission@fsktm.um.edu.my by the 30 September, 2001. For more information, please visit the AMOC homepage or email amoc-submission@fsktm.um.edu.my.

We invite proposals for three-hour tutorials on topics relating to the theory and/or practice of mobile and wireless computing and communications. The aim is to offer conference delegates both tutorials on up-to-date technologies, and case study tutorials on the application of the technologies to real-world problems. Please refer to the conference homepage for the submission guideline. **Tutorial submission deadline : 30 July, 2001.**

Organised by the University of Malaya in cooperation with ACM SIGMOBILE
